

MEMORANDUM
Comfort Lake-Forest Lake Watershed District

To: Board of Managers
From: Mike Kinney
Subject: 2018 Blue Water Science Reports – Revised

Date: February 22, 2019

Background/Discussion

At the January 24th regular board meeting, Steve McComas of Blue Water Science presented the 2018 aquatic plant survey reports. At that time, Manager Anderson requested changes to most of the reports. Mr. McComas has since revised all but one of the reports and returned to staff. The Comfort Lake Nitrogen Assessment Study report is still under revision and will not be ready in time for the February 28th meeting. As such, staff will bring it to the March regular board meeting for consideration of acceptance.

The following list summarizes the reports that were revised, and that which did not have requested revisions.

Revised Reports

- Bone Lake CLP and EWM Delineation & Assessment
- Bone Lake Point-Intercept Macrophyte Survey
- Comfort Lake CLP and EWM Delineation & Assessment
- Lake Keewahtin AIS Detection Survey
- Forest Lake CLP & EWM Delineation & Assessment
- Forest Lake Flowering Rush Delineation & Assessment
- *Comfort Lake Nitrogen Assessment Study (to be brought to March regular board meeting)*

No Revisions (This report is the same as what was passed out in the 1/24 board packet, and therefore will not be double-printed for the 2/28 board packet)

- Forest Lake Point-Intercept Macrophyte Survey

Recommended Action

Proposed Motion: Manager _____ moves to accept the 2018 Blue Water Science reports. Seconded by Manager _____.
