

Rule 7.0 Permit Application Checklist

A project proposing to alter or fill land below the 100-year flood elevation of any stream, wetland, public water, stormwater management basin, or landlocked subwatershed unless a permit is received from the appropriate local government unit in accordance with a state-approved floodplain management ordinance. A project proposing to redirect flow across a drainage boundary or obstruct the natural flow of surface water.

Submit the following items with your application:

- Signed permit application
- Permit fee and permit review deposit paid
- Site Plan indicating location of 100-year flood elevation of any wetland, public water, stormwater management basin, or landlocked subwatershed on or directly adjacent to the property;
- Site Plan and supporting calculations indicating location and volume of any floodplain impact and mitigation;
- Site Plan indicating lowest floor elevations of all proposed structures; and
- Analysis of impact of alterations to surface flow on upstream and downstream landowners, flood risk, basin or channel stability, groundwater hydrology, stream baseflow, water quality or aquatic or riparian habitat.
