

MEMORANDUM

Comfort Lake-Forest Lake Watershed District

Date: January 31, 2023
To: CLFLWD Board of Managers
From: Mike Kinney, District Administrator
Subject: Program Update for Interagency Communication

District Wide

Background/Discussion

Staff began preparing program updates for the Board's review in 2022. Programs previously presented to the Board include Permitting (3002), Non-Point Source Pollution Abatement (3004), Education and Outreach (3005), and Aquatic Invasive Species Prevention & Management (3011). These updates provide the Board with information on the organization's ongoing program efforts in support of the Watershed Management Plan.

The District's 10-year Watershed Management Plan identifies Interagency Communication (3006) as a priority issue. This program focuses on supporting other organizations and regional efforts. The Board and staff have varying responsibilities with this program. The CLFLWD's strategies and successes place it in a unique position to provide support and leadership to partners and stakeholders.

The accompanying presentation includes an overview of recent engagement efforts in support of Interagency Communication (3006).
